

# Hauser Maschinen launches new website

## New launch of website

After many months of intense work, we have made the switch from our old to our new website this July.

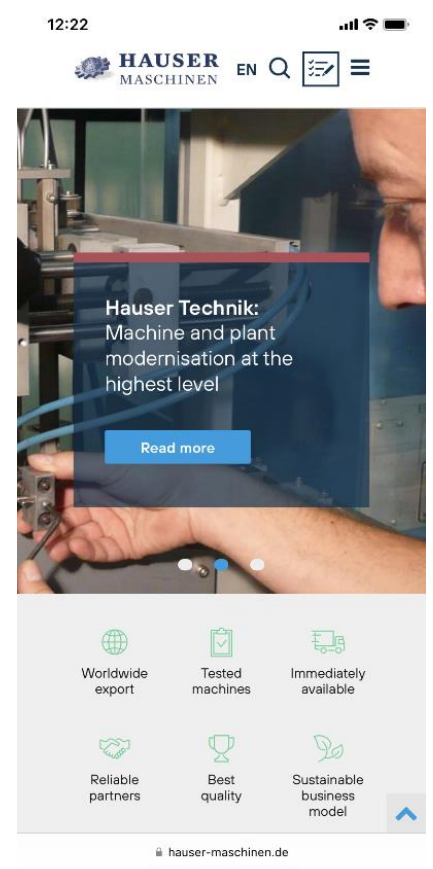

After many discussions, brainstorming sessions and dialogues of our project team, we have now launched a new **responsive website**, making it easier for our customers and partner to access our website regardless of the type of device – desktop, tablet or mobile phone: the layout is adjusted to give you the most comfortable experience when you visit <https://www.hauser-maschinen.de>

## Quality used machines for immediate delivery

On our landing page our slider provides you with the option to access the individual pages for Hauser Maschinen and Hauser Technik with once click, or to learn more about our take on sustainability and social responsibility.

Here you will also find **quick links** to our offer on currently available quality second hand machines for

- Pharma, cosmetics, and chemistry
- Confectionary and food, or
- For a selection of new machines

Looking for a machine from a specific manufacturer? Go to our or **“Manufacturers”** page and see an overview in alphabetical order of all manufacturers whose machines we currently offer. Alternatively, you can search by application on our **“Machines”** pages or use the search function to type in any specific machine you might require.

Want to see all currently available machines and lines in one document? Go to our **“Catalogue”** page and download your pdf-copy. You can also still subscribe to our **“Newsletter”**.  
By the way, all pages are available in English, German, Spanish, French, and Polish.

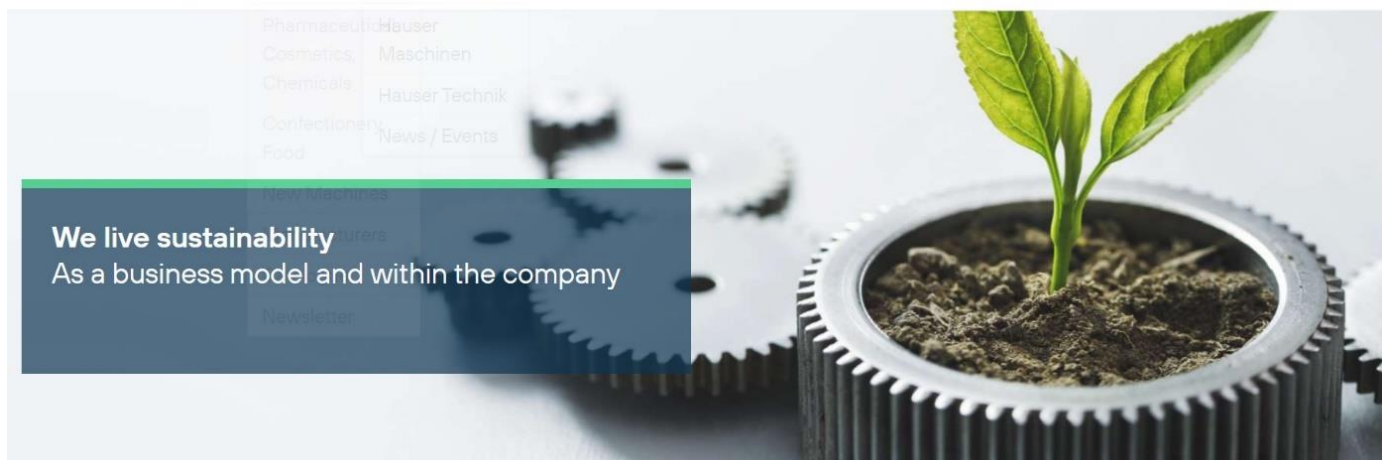

**Sustainable solutions**

Our business model has been sustainable since the day Hauser Maschinen was founded in 2003. Avoiding waste where possible and re-using equipment helps in reducing one carbon footprint. To find out more, go to our **“Sustainability”** page, which also includes information on our social responsibility activities.

**Manufacturers**

Overview of manufacturers of all currently available machines and equipment. If this does not include what you are looking for, please contact us at [info@hauser-maschinen.de](mailto:info@hauser-maschinen.de), as our inventory changes daily.

AC Automation (1)	Alpha-Pack Europe srl (1)
Aquatherm GmbH (1)	AS Siebler Verpackungsmaschinen (5)
Bausch + Ströbel SE + Co. KG (3)	Bausch Advanced Technologies, Inc (1)
BFB SpA (2)	Binder GmbH Apparate und Behälterbau (1)
Bohle Maschinen + Verfahren GmbH (3)	Bosch GmbH, Robert, o/o Syntegon Technology GmbH (6)

Naturally, all of this could not have been done without the help of some very talented people – we’d like to take the opportunity to thank Visionaere GmbH, webdecker Berlin, NTC Andar Sp.z.o.o., and Christine Skerratt, as well as the multi-lingual team of Hauser Maschinen e.K. and Hauser Technik GmbH.

We hope you like our new website as much as we do – let us know what you think!
