HAUSER MASCHINEN

Quality Used Machines from Germany – October 2023 –

To our valued customers!!

Hauser Maschinen would like to send to you with this October Newsletter a selection of our latest used machine arrivals and support you in your next machinery projects. If you are interested, please contact us [here](#) with any questions or inquiries.

We are looking forward to your feedback!
ALL THE BEST - your HAUSER Team!

All our stock can be viewed on our [website](#), with photos and often videos. Please don't forget to also offer us your surplus equipment!

1. HIGHLIGHTS

1. **Groninger vial line including labelling**, comprising **ASVG 100** washing machine, (max. 3,000 vials/ h), **DTE 1000** rotary infeed table under LF-unit, **DFVG 4001** vial filling & stoppering machine with LF-unit, (4 filling stations), **DTE 600** rotary infeed table, **KVG 211 A** crimping machine (max. 3,600 vials/h) incl. camera inspection system, all equipped with Siemens SIMATIC S7-300, **HEA 105** vial labeling machine, **DTE 600** rotary infeed table, Including several format parts, [details+video](#)

2. **Groninger SMB 18005** assembly machine for plastic backstops on disposable syringes, Siemens SIMATIC S7-400 SPS, max. 18,000 units/ hour, [details](#)

3. **Rota R941 MA** stand-alone linear ampoule filling & sealing machine for closed ampoules, with 4 rotary piston pumps, max. 12,000 ampoules/ h (of 1+2 ml. ampoules), incl. format parts, [details](#)

4. **Pago System 610 PHARMA** labeller for bottles, etc. with **PAGOmat 6/2 R-75 100** label head (max. 75 m/min.), running left-right, max. 60 bottles/ min., with Allen NGT2 thermal transfer printer & PCE camera inspection with reject, Siemens Simatic S7-300 +Touch-Operator Panel, including format parts, [details](#)

5. **Herma/Uhlmann** vial labelling & packing line for vaccines, etc. in 2R and 3 ml., with **Herma132M HC** wrap-around labeller (400/min.), infeed rotary table, Videojet DataFlex 6530 thermal transfer printer, checking print, code & label presence with reject device, Siemens IPC 277E 12" color touchscreen, Siemens S7-1500 PLC, **Uhlmann** carton tray opener & closer (15-150 trays/min.), **LiPro** feeding system & DELTA robot "Pick&Place", **C2155** horizontal cartoner (150/min.) "Pick&Place-System", RonTech booklet feeder, with Nordson ProBlue 4 hot melt unit, REA JET HR inkjet printer, camera code verification, VisioRead color camera inspection, USP serialization platform & integrated **OCS HC-A-2000-2** checkweigher (max. weight 300 g), year 2021 – unused, [details+video](#)

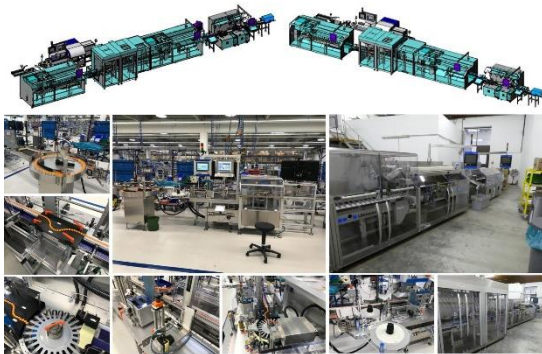

6. **Fette PT 3090** double layer rotary tablet press, 61 stations (EU-19), pre-compression 100 kN, main compression 100 kN, capacity 109,800 - 585,600 tabl./ h, excellent working condition with less than 7,000 running hours, [details+video](#)

2. FILLING & CLOSING MACHINES, TABLET PRESSES

1. **Bausch + Stroebel KSF 2020** monoblock filler and screw capper, 2 filling heads, dosing range 0.1 -100 ml. with appropriate pumps, 1.closing station for droppers/bungs, etc., 2. closing station for screw caps, including format parts, max. 6,000 vials/ h, including infeed and outfeed tables, [details](#)

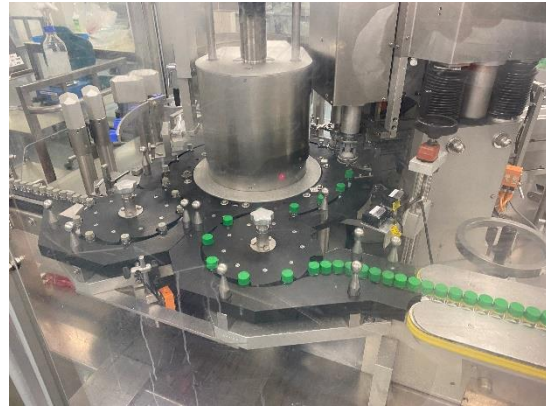

2. **SERAC GAIA** filling & closing line for drinking vials, suitable for liquids & powder ('Vitashots B12'). with 2 connected filling machines, - **GAIA R1V1/520** liquid filler, with rotary infeed table, 3 filling heads, (0.2ml - 250ml), 2 capping stations, vibrating bowl feeders for bung inserts. - **GAIA RP1E1E1/520** powder filling and capping machine, with ENFLEX DS-80 auger filler, hopper/feeder inserter for small plunger, cap hopper, feeder & press capper for overcap, with 16 station star wheels, format parts, OMRON PLC etc, never in production, condition as new, [details+video](#)

3. **IWKA TZK100** automatic tube feeding system for conical shaped tubes, max.40 -100 tubes/ min., [details](#)

4. **Kilian T300/32 EU-B** rotary tablet press, with 32 stations (EURO-B tooling), suitable for round and shaped tablets, with up to 16 mm diameter, maximum fill depth 16 mm, pre-compression 28 kN, max. main compression 100 kN, output up to 216,800 tablets per hour, rotary paddle feeder, includes Kilian CW100 control unit, [details+video](#)

3. PACKAGING MACHINES

1. **CAM AV** vertical cartoner, intermittent motion, reverse tuck closure, pre-folded leaflet inserter, machine on wheels, max. 70 strokes/min., [details](#)
2. **CAM HMM.10** horizontal cartoner for tubes, etc., continuous motion, dual lane tube feeder, pre-folded leaflet inserter, flap emboss coder, reverse tuck closure, max. 200 cycles/ min., [details](#)
3. **Cariba AV30/132** vertical cartoner, intermittent motion, reverse tuck closure, machine on wheels, max. 50 strokes/min., [details](#)
4. **Cariba C300** horizontal cartoner with automatic bottle infeed, continuous motion, reverse tuck closure, GUK pre-folded leaflet inserter, max. 250 strokes/min., [details](#)
5. **Harro Höfliger Cartonetta** horizontal end-load cartoner, with hand fed bucket infeed, including flat sheet leaflet folder, glue closure with Nordson ProBlue 4 hot melt unit, max. 75 cartons/ min. (2000 overhauled by Harro Höfliger), [details](#)
6. **Romaco-Promatic P91S** horizontal cartoning machine for strips, sachets, etc., max. 140 cartons/ min., pre-folded leaflet inserter, ink deboss coder, glue closure of carton flaps with Nordson ProBlue Type 7, bar code reader, includes **Romaco-Siebler FlexTrans FT1-400** with two (2) ABB FlexPicker for automatic transfer of strips, etc. from the belt into the cartoner infeed, max. 375 packs/ min., [details](#)
7. **Uhlmann C2504** continuous motion cartoner, suitable for blister count from 1 - 12 blisters per carton, with Leaflet/Booklet feeder (machine also prepared for GUK leaflet folder and feeder), Wolke m600 advanced inkjet printer, set up for reverse tuck cartons with Nordson PROblue 4 hot melt glue system for tamper evidence, **Pago Pagomat 6/2** labeller for top labelling (vignette/bollino), max. 500 cartons/ min., as new (only approx.

540 working hours), [details](#)

8. **BFB (IMA) model 3791AM** compact overwrapper, easy size changeover, and maximum reliability, for single wrapping and bundling of rectangular products on one or several layers. max. 25 cartons/ min., [details](#)

9. **BFB (IMA) MS300A** collator and stretch bander for cartons, including discharge rake to remove bundles from machine (prevents heating the product), Siemens S7-300 PLC with UniOP HMI, max. 40 bundles/ min., [details+video](#)

10. **CAM RV-P** high speed overwrapping machine with plate sealing for cartons, folding boxes, etc. in heatsealable foil (PP, PVC, Polyethylene, laminated papers, wax papers, etc.), capacity up to 150 strokes/ min., [details+video](#)

11. **ETT TFS40C** tray former with Nordson ProBlue 4 hot melt unit, Siemens SIMATIC S7-300, including format parts, max. 40 trays/ min., [details](#)

12. **Pester PEWO-pack 250** stretchwrapper for folding cartons, etc., 90 degree infeed conveyor, suitable for PE-foil, max. 30 collations/bundles per min., [details](#)

13. **Pester PEWO-pack 800** shrink packer für bottles/aerosol cans, right-angled infeed belt with grouping station, max. 25 collations/ min., previously used for packing aerosol cans, [details](#)

14. **Sollas AB 25/50** banding machine for cartons and similar with infeed stacking/collation unit (cartons collated on their narrow side), max. 18 strokes/ min., [details+video](#)

15. **Sollas M100** automatic overwrapping machine for cartons, DVD, CD, etc., tear tape application. Output 20 to 100 cycles/ min., 2 machines available, [details](#)
