

As 2023 is coming to an end, Hauser Maschinen and Hauser Technik are looking back on an exciting and eventful year.

Once again, we've been very pleased to see **the world coming to our premises** in Germany for inspection and FATs. It is also great to see so many of our machines being delivered and working around the world.

Even though the majority of our projects this year were in Europe, we still had projects and deliveries in all continents.

In addition to all those interesting and successful projects, there were many more highlights:

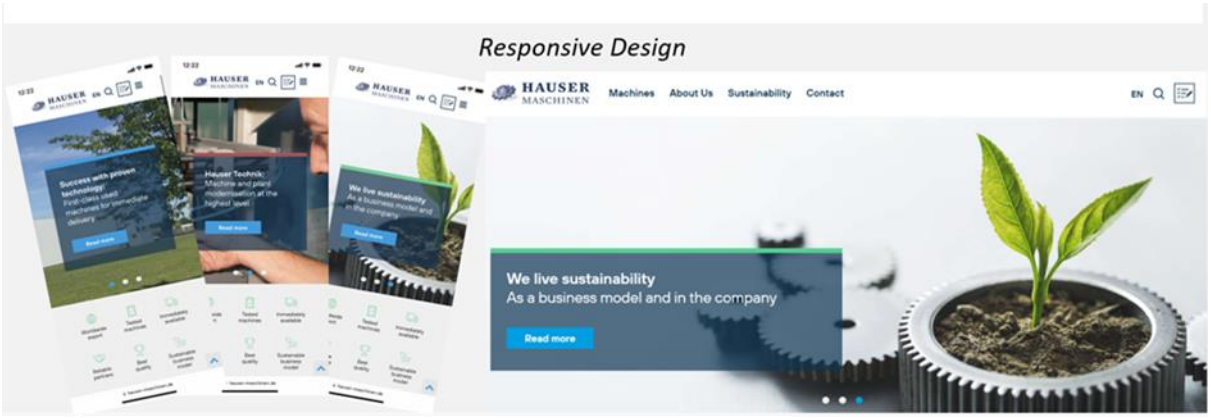

Interpack Düsseldorf:

In May we exhibited once more at Interpack Düsseldorf, and – after the six-year break of this show – had the chance once more for interesting talks with existing and new customers, which led to several new projects.

New Website:

2023 also saw the launch of our new website in July. We are very happy with the outcome and the new and enhanced functionalities which make it even easier for our customers to view our machine offer, enquire or subscribe to our newsletter.

In addition, we have added more information on other areas of the business such as sustainability, where we highlight the contribution of second-hand machines to a sustainable business environment. We are grateful for the positive feedback we have received from our clients on our new website.

Sustainability

Speaking about sustainability and the environment, we have also given a home to 60 hives of bees, which are taken care of by an experienced beekeeper. They get along well with the sheep who also live on our premises.

We have noticed that communication via **social media** has become increasingly important, replacing in part former communication channels. Our LinkedIn channel now has +5000 followers, +1000 people have subscribed to our youtube channel, and we are also present on Instagram and Facebook. If you have not already done so, do join us on your favourite social media platform to stay updated on new arrivals or news about our companies.

Hauser Maschinen e.K. 20th anniversary

On 1st October, we celebrated the 20th anniversary of Hauser Maschinen. We have come a long way from our first beginnings in 2003 with a small rented office in Eschborn near Frankfurt, via offices in Berlin with hired storage to our own site with a modern and fully equipped workshop in Raguhn-Jessnitz.

Year after year we have grown and are proud to be your well-established partner for reliable second-hand process and packaging machinery for the pharmaceutical, cosmetic, chemical, and food industries.

Outlook for 2024:

2024 is about to begin and we are looking forward to see what the new year will bring. Some dates are already fixed in our calendar, for instance the Achema 2024 in Frankfurt, where we will exhibit once again in Hall 3.0 Stand A36.

We wish you a happy holiday season and a peaceful new year 2024, wherever you are!
